

Professional Summary

Driven senior pursuing a Bachelor of Science in Computer Engineering with a focus on embedded systems, microcomputing, robotics, and game development. Experienced in low-level programming, hardware-software integration, and hands-on system design through academic and professional projects. Skilled in C/C#/ C++ and working with development tools such as microcontrollers and game engines. Passionate about building interactive systems that bridge hardware and software, from robotics to game experiences. Eager to grow in dynamic environments that combine embedded engineering and game development.

Experience

Florida International University Graham Center
IT Technician

Miami, FL August 2023 – June 2026

- Provided expertise IT support for 3 SaaS applications (XIBO, GGLeap, Fusion) and 3 OS tools (Active Directory, SCCM, Unified Write Filters) for the FIU student centers.
- Provided coverage for multiple locations on campus using reservation systems called Fusion and GGLeap, as well as trouble shooting and/or repairs for any computers, consoles, and input devices.
- Opened a new computer lab with a collaboration with DELL, Alienware, and Pinnacle for FIU Esports Alienware Lounge housing over 35 states of the art workstations.
- Imaged and programmed over 35 computers using SCCM and Windows UWF
- Provided maintenance and service towards over 25 Digital Signage Displays and Daktronic's Electronic Message Boards across campus, using Active Directory to push group policies allowing security rules, auto login systems, and used a signage program called XIBO to manage the content.

TeKnIK Labs
Coding Instructor

Miami, FL June 2026 – Current

- Provided instruction in Lua programming using the Roblox Engine, teaching game development concepts to classes of up to 20 students.
- Led and managed classroom environments, delivering structured lessons while maintaining student engagement and progress.
- Utilized and supported multiple SaaS platforms for class management, coding instruction, and student collaboration.
- Assisted as a Teaching Assistant across various courses, quickly adapting to and supporting different software applications and technologies.
- Guided students through hands-on game development projects, including scripting, debugging, and implementing gameplay mechanics.
- Troubleshoot technical issues related to Roblox Studio, student code, and classroom software to ensure smooth instruction.

Technical:

Skills

Programming languages: Python, C, C++, C#, GDScript
Developer Tools: Git, GitHub, Visual Studios, Unity, GoDot, Replit, Arduino

IT/Hardware:

Windows OS Imaging (SCCM, UWF), Active Directory (GPO, User Management), Digital Signage (Xibo), Booking (Fusion, GGLeap), DevOps (Microsoft Azure), ESP8266 (Microcomputer)

Education

Florida International University
Bachelor of Science, Computer Engineering. GPA 3.2

Miami, FL
Expected May 2027

Florida International University
Associates in Arts, Computer Engineering. GPA 3.5

Miami, FL
June 2025
